

HOLY TRINITY CATHOLIC CHURCH

Building System Solutions
108 Carroll Road
Centreville, MD 21617

Dear Michael,

Please feel free to use this letter of recommendation for your services as you please. With your permission I will also forward to my Finance counterparts within the Archdiocese of Washington.

Chris

To whom it may concern:

Building System Solutions has been servicing Holy Trinity since their company started. The company's principal, Michael Younger, has played a critical role in installing and servicing virtually all of Holy Trinity's HVAC Systems. Over the past few years alone he was primarily responsible for the following work performed at Holy Trinity:

- 1) Installed and maintained 90 Fan-Coil units, and VAV's within our school buildings and rectory
- 2) Installed 30 ton air cooled chiller, and associated piping & controls
- 3) Replaced 60 ton air cooled chiller heat exchanger
- 4) The repair of hydronic system pumps, and associated piping & controls
- 5) Maintain and restoration of multiple Steam Boilers
- 6) Installed, maintained, and repaired Large Tonnage Rooftop Air Conditioning Units
- 7) Installed, programmed and maintain Building Management Control Systems

Building System Solutions has provided professional, comprehensive, and courteous service personnel. They have proven themselves to be responsive even during severe weather events, and after-hours emergencies. Building System Solutions has delivered excellent results, and above all else maintains an honest, ethical relationship with Holy Trinity. I would encourage you to engage Building System Solutions and have confidence that you will not be disappointed. I can also be reached in person and would be happy to share Holy Trinity's experiences with Michael.

Sincerely,

Christopher Kehoe
Finance Director
